FOR IMMEDIATE RELEASE

### Collaboration Efforts Bring Wolf Point Community a Dentist

Wolf Point --- It is not very often that regulation of any kind is given a “good job” pat on the back. The community of Wolf Point has acknowledged the Board of Dentistry for a job well done. The community rallied together to address licensure obstacles to address their dire need for a dentist. While pursuing this endeavor the community approached the Board of Dentistry to help. Collaboratively, the community and the Board worked together to find a resolution.

As a result of the involvement and commitment of both, the community now has a dentist to serve the needs of their community. The Board would like to thank the community of Wolf Point for their willingness to work with the Board. Small opportunities are often the beginning of great enterprises.
